

FROG® 90-DAY ALGAE BARRIER®

STEP-BY-STEP INSTRUCTIONS TO PREVENT ALGAE GROWTH

- 1 Clean and vacuum your pool.**
 - Skim any organic material from the pool
 - Scrub the side walls to loosen any debris
 - Vacuum your pool
- 2 Backwash or clean your filter.**

Remove all debris from pump basket.
- 3 Balance your water:**
 - Confirm chlorine levels are in the proper range
 - pH: 7.2-7.8
 - Alkalinity: 80-120 ppm
 - Cyanuric acid: 20-80
- 4 Test your pool for high metal content.**

Ensure copper levels are under 0.2 ppm.
- 5 Ensure your pump is on and circulating water effectively.**
- 6 Add FROG® 90-Day Algae Barrier® Pool Pod.**

Follow the product label for dosage levels and application instructions.
- 7 Swim Ready:**

Your pool is safe to swim in 30 minutes after adding your pods to the skimmer basket.
- 8 After 24 hours remove and discard empty Pool Pod.**
- 9 Use 1 pod per 10,000 gallons - every 90 days.**

ASK THE EXPERTS

Algaecide can be used as a preventative and curative treatment that helps keep your pool water clear and healthy by:

Preventing algae growth before it starts

...

Eliminating existing algae

...

Reducing chlorine demand, helping sanitizer work more efficiently

...

Improving water clarity and overall appearance

...

Protecting pool surfaces from staining and buildup

Using algaecide regularly is a key part of a balanced pool care routine, especially during warm weather or periods of heavy pool use.
